## The Last Cure (Reviewed by Mark Ho)

*The Last Cure* was one of the most popular films this year. Paul Johnson directed *The Last Cure* and he shocked the audience with an exciting story.

*The Last Cure* is a **mix** of action, adventure, horror and science fiction. The main character is George Burton, a 16-year-old brilliant young scientist. In the beginning of the film, George's father dies after getting a strange disease. This disease also kills dozens of other people. George is very upset but he focuses and creates a time machine. He goes back in time and saves his father from getting the disease. However changing the past causes the future to change. Now the disease has killed millions, not dozens ...

All the actors and actresses in this film were excellent. Andy Lee, who plays the father, is superb in this film. Although **he** is not the main character, he is eye-catching in every scene.

*The Last Cure* has some scary scenes. Therefore it is not suitable for children to watch. However for everyone else who likes to be scared, you will love this film!
